【The number of positions】募集人数

1 position

【Starting date】着任時期

Negotiable. As early as possible is preferable.

【Qualifications】応募資格

The applicant should meet all of the requirements below:

1) Have a Master's degree or equivalent achievement record; a doctoral degree is preferred.

2) Have research and practical achievements in online education and metaverse.

3) Must agree with college policy and educational philosophy.

4) Must understand the management policy of the Center for General Research and be responsible for their work.

5) Must reside within commuting distance and engage in the work of the college.

6) Must understand and be able to promote the college's diversity and inclusion policy.

[Additional Notes]

1) In accordance with the college's Diversity and Harassment Declaration, hiring decisions will be made based on one's ability and character. However, where the abilities and other qualifications are the same, priority will be given to an applicant who would contribute to our gender diversity.

2) Considering the present global situation, preference will be given to an applicant with Ukrainian nationality residing in Japan. Ukrainian researchers residing in Japan or graduate students whose current situation makes it difficult for them to return to their home countries and who may not be able to fully utilize their professional abilities are encouraged to apply. We hope their excellent IT capability and the diversity they will add to our community will help the Center for General Research advance its educational technology to the next level.
